

Wider Family Learning: Saturday Science III – Biology Taster

Course overview

Would you like some fun and educational activities to do with your children? Have you thought about science? This session will introduce you and your child to our Saturday Science - Biology course. We will use ourselves as well as things from the world around us to learn a bit about biology.

What will I study?

You will:

- Identify and measure what happens in your body when you are active
- Learn how to be safe when experimenting and studying things in our environment
- Have instructions to take home to experiment further and share with the family

Assessment method

- Practical and written activities.

Entry requirements

For parents and children at Key Stage 1 or 2

What should I bring with me?

You will need to bring a pen, paper and a folder to each lesson. An apron, old shirt/T-shirt from a grown-up or messy play cloths are strongly recommended for the main course. You may also wish to take photos of your child's experiment.

Key information

Where possible this course will take place on site with social distancing measures in place. In the event of a lockdown, the course will take place online via MS Teams or via a remote learning pack.

Possible next steps

Following the successful completion of this course, you may like to enrol in the full Saturday Science – Biology course and any of our other Wider family learning courses.
